Abstract of FR2821540

The vacuum cleaner suction head has a casing (10) connected to a tube by a pivoting sleeve (12). The head has a lower sole plate (14) and wipers to contact the floor. The head has rear rollers (24,26), with the pivot axis behind the rolling axis or coincidental with the axis. The wiper is mounted on a support (42,34) at the rear of the head in which the roller axis is situated.
